

Support Action co-funded within the FP7

Start SMART... move fast!!!

What is SMART?

SMART is a project co-funded by the FP7, providing services to stimulate and support transnational **research projects realized by SMEs**, also in conjunction with large enterprises and research organizations.

The SMART consortium comprises a wide range of stakeholders related to surface transport: SMEs Clusters, Public Innovation Agencies, Private Technology Transfer companies, and Large Enterprises linked to Regional Clusters.

What does SMART offer?

Being part of the SMART community, you can get access to the following free services and benefits:

For SMEs

- Training activities on interesting FP7 programmes for research actions in the field of Surface Transport
- Free evaluation of RTD projects ideas
- Support to set-up RTD own projects and participation in projects led by large organisations
- Wide visibility through the SMART business card service and the registration in the SMART DB of qualified SMEs
- Networking opportunities participating in the SMART international events and interacting with key global players, role models and speakers on top industry trends and developments

For Large Enterprises

- Access to a DB of qualified SMEs to find potential partners for R&D and innovation projects
- Possibility to be aware of, and involved in highly innovative R&D projects led by SMEs
- Support innovation process of SMEs to achieve Corporate Social Responsibility objectives

For Transport Clusters

- Facilitate the involvement of clusters' SMEs in R&D international projects
- Opportunity to provide clusters' members with additional free services and support on FP7 funding opportunities
- Participation in specific intra-cluster events to encourage and support the set-up of strategic international collaboration
- Improve the commitment of the cluster towards its members

Support to SMEs in developing R&D projects on Surface Transport through EU funding programs
